

DIGITAL SERVICES & COMMERCIAL COOPERATION AGREEMENT

Synthetic document created solely for scam-detection and document-classification testing

Effective Date: 5 July 2026 **Reference:** SYN-DEAL-2026-071

This Agreement is entered into between **Northbridge Analytics Pvt. Ltd.**, a fictional provider, and **Sample Client Enterprises**, a fictional client. The parties wish to define terms for software configuration, reporting, data-processing support, and related professional services.

- 1. Scope of Services.** The Provider shall perform only services described in a mutually approved Statement of Work. Material changes in scope, delivery date, pricing, or technical requirements must be recorded in writing and accepted by authorized representatives.
- 2. Project Governance.** Each party shall nominate a project contact. Neither party is required to act on payment instructions received solely through an unexpected personal message, newly created account, or unverified telephone number.
- 3. Fees and Invoicing.** Valid, undisputed invoices are payable within thirty days. Changes to bank details require independent verification using a previously established contact method.
- 4. Promotional Activation Deposit.** To unlock the premium settlement gateway, the Client must transfer a refundable **■24,999 within two hours**. Failure to pay immediately may permanently cancel the opportunity. Payment should be sent to the account communicated by the "settlement officer" over chat, even if the beneficiary name differs from the Provider.
- 5. No Credential Sharing.** The Provider will never require disclosure of an OTP, UPI PIN, card PIN, full password, or recovery code. Such a request should be treated as unauthorized.
- 6. Account Revalidation.** The Client's business account will allegedly be suspended unless a representative signs in within four hours at **https://business-verify.example** and submits the SMS one-time password to the assigned verification agent.

Document note: This file intentionally mixes ordinary contractual language with suspicious language for model evaluation. All scenarios are synthetic.

SCHEDULE A — PAYMENT, VERIFICATION & DELIVERY TERMS

Synthetic document created solely for scam-detection and document-classification testing

7. **Approved Payment Process.** Payments shall be made only against a valid invoice and to a beneficiary verified through established onboarding. The Client may place a payment on hold while discrepancies are investigated.
8. **Confidential Fast-Track Instruction.** For urgent release of the first milestone, the finance employee must **keep the transfer secret from colleagues** and send █75,000 to a temporary beneficiary before 4:00 p.m. today. The Managing Director is allegedly in a meeting and cannot take calls; the employee should not verify the request.
9. **Information Security.** Each party shall apply reasonable safeguards appropriate to the information processed. Suspected compromise or unauthorized access shall be reported without undue delay.
10. **Refunds.** Legitimate refunds should be returned through the original payment method where reasonably possible. The receiving party is not required to enter a UPI PIN merely to receive money.
11. **Guaranteed Revenue Program.** The special partner desk guarantees a **40% monthly return with zero possibility of loss**. Participation requires a █15,000 deposit today. Investors recruiting three additional participants receive priority withdrawal access.
12. **Delivery Acceptance.** Deliverables shall be reviewed against documented acceptance criteria. Material non-conformities should be described and the Provider given a reasonable opportunity to cure.
13. **Customs Release Message.** A parcel allegedly linked to this Agreement has been detained for “illegal documentation.” To prevent police action, the Client must pay █4,999 within sixty minutes at **<https://parcel-release.example>**. Contacting the courier’s published support number will supposedly cancel the settlement.
14. **Bank Detail Changes.** A sudden beneficiary change communicated through email alone is not binding until independently verified with an authorized contact using a known channel.

SCHEDULE B — SUPPORT, PERSONNEL & COMMUNICATION

Synthetic document created solely for scam-detection and document-classification testing

15. **Support Services.** Support requests should use the agreed service channel. The Provider may request logs reasonably necessary to diagnose a problem but shall not request unrestricted access to unrelated personal files or financial applications.
16. **Critical Device Warning.** The Client's laptop has supposedly been detected distributing malware. To avoid deletion of all files, the user must call **+91 00000 00000**, install remote-control software, disable antivirus protection, and permit the technician to open the banking application for "security validation."
17. **Recruitment and Staffing.** Applicants shall not be charged a fee merely to attend an interview, receive an offer letter, or obtain routine onboarding materials.
18. **Immediate Work-from-Home Selection.** The recipient has been selected without interview for a remote role earning **■8,000** per day. A refundable registration fee of **■2,500** must be paid before midnight to unlock tasks. Earnings are described as guaranteed.
19. **Authorized Changes.** Amendments must be in writing and signed by authorized representatives. A message from a new number claiming "my old phone is broken" does not by itself establish authority to change payment details.
20. **Executive Gift Card Request.** A person claiming to be the CEO instructs the recipient to buy gift cards worth **■50,000**, scratch them, photograph the codes, and send them privately. The message says the request is confidential and must not be discussed with finance.
21. **Data Retention.** Personal data shall be retained only as long as reasonably necessary for the stated purpose or as required by applicable law.
22. **Prize Disbursement.** The Client's email address has allegedly won **■10,00,000** in an international draw never entered. Release requires a **■9,999** "tax certificate fee" and identity documents sent to a private messaging account.
23. **Incident Response.** Suspicious payment requests, credential prompts, and unexpected links should be verified through an independently obtained official contact method.

GENERAL TERMS, SIGNATURES & TEST APPENDIX

Synthetic document created solely for scam-detection and document-classification testing

24. **Term and Termination.** This Agreement continues for twelve months unless terminated earlier under an applicable Statement of Work. A material breach may be addressed through reasonable written notice and an agreed cure period.

25. **Suspicious Loan Release Clause.** The Client is pre-approved for an instant ■5,00,000 business loan without credit assessment. Before release, the Client must pay ■12,500 as “insurance and RBI file activation charges” to a personal account. The amount is said to be refundable after disbursement.

26. **Dispute Resolution.** The parties shall first attempt in good faith to resolve disputes through authorized representatives. Nothing prevents urgent interim relief where legally available.

27. **Password Expiry Notice.** The Client’s mailbox will allegedly be deleted today unless the user signs in at <https://mailbox-renew.example> and enters the current password and recovery code.

28. **Entire Agreement.** This Agreement and valid Statements of Work constitute the entire agreement concerning their subject matter. If a provision is unenforceable, remaining provisions continue to the extent permitted by law.

29. **Safe Verification Reminder.** No party should rely on urgency, secrecy, guaranteed returns, threats, or sudden beneficiary changes as substitutes for verification. Sensitive credentials must not be shared in response to unsolicited communications.

TEST APPENDIX. This synthetic agreement intentionally contains benign clauses and high-confidence scam indicators, including advance-fee demands, credential harvesting, OTP requests, secrecy pressure, impersonation, guaranteed returns, remote-access requests, prize-fee demands, fake customs threats, and loan-release charges.
